

# Election program 2018-2019

Enterprising Students Leiden

# More room for self-development

- Additional space for internships in the curriculum.
- Opportunities to study abroad.
- Possibilities for honours students to do an internship or board year.
- Diploma supplement for board members of student and study associations.
- No efficiency-increasing measures such as a second-year BSA or the unnecessary dropping of credits.
- Introduction of flexstudying: pay per ECTS
- Possibility to take courses as an alumni
- Minor for board members to develop alongside your board year

“ We believe that you should not only develop yourself within your education but also outside of it. That is why ONS is calling for more space for internships in the curriculum, more opportunity to study abroad and the possibility for honours students to do an internship or board year. In addition to this, we have to look at new opportunities to develop oneself by introducing flex education, the possibility of taking courses as alumni and attending courses at the university next to your board year. ”

# Better education

- The recording of all lectures and publishing them online.
- Online feedback on taken examinations.
- More study places during exam weeks.
- No Bachelor's / Master's selection
- Better information about studies through mandatory matching.
- Student privacy should be taken care of.
- Jochem Myjer must have a permanent appointment.
- Better guidance for students regarding study stress.
- No exclusion from exams for missing education.
- 5 days between the exam result and the retake.
- Space for practical experience in bachelor curriculum

“ More innovation in education is needed. All lectures must be recorded, examination insights must be available online and more study places are required during and outside the exam periods. In addition, we have to make agreements with all other Dutch universities in order not to participate in Master's selection. In order to continue to represent the interests of students, the privacy of students must be guaranteed, the managing of study stress must be supervised and the arrangements for examinations must be harmonized.

# A sustainable university

- Every new university building must have solar panels.
- Cheap refillable bottles should be available on all vending machines.
- Waste has to be separated, also behind the scenes.
- Less paper should be wasted.
- Bring your own cup = cheaper coffee.
- Expansion of LUGO facilities is needed.

“ In order to become a sustainable university, more solar panels have to be installed, cheap refillable bottles should be available in every drinking machine, waste has to be separated and less paper should be wasted through coffee cups and unnecessary copying. As the oldest university in the Netherlands, we have to set a good example! ”

# Internationalization and inclusiveness

- Offering free English and Dutch courses for all students.
- Improve communication: all university websites, information and communication also in English.
- Allow Dutch and foreign students to integrate more by having one introduction week.
- Increase English language level of all teachers
- Fair communication regarding housing and expansion thereof is needed.
- Stimulating participation in the Den Haag campus through Sounding Board.
- Translation of the transcript of the UR and FR in should also be available in English.

“ Our university is in the top 100 of the best universities worldwide and more than 115 different nationalities are studying here, so we cannot stay behind. The university must offer more free courses in English and Dutch for all students. In addition, the EL CID week and OWL must be rejoined and all communication should also available in English. The international students must also be heard and informed in the participation council. ”

# Better facilities

Cheaper catering at the university.

Actual canteen in the University Library.

Providing information about extra study places.

No discrimination on study places such as the Asian / African Library.

Improve Uis and blackboard.

Make the university app workable.

“ A university falls or stands at its facilities, so it may be expected of a top university that the facilities are in order. For example, we are committed to creating cheaper and extensive catering in all university buildings, expansion and information provision of study places and better digital resources from the university. ”

# Stronger student participation

- More visible and better cooperation between educational committees, assessors, faculty councils and university council.
- More evaluation and feedback on university policy.
- Cooperation with other student parties throughout the Netherlands.
- The voice of international students should be heard in student participation.
- The visibility of the University Council Members for students should be increased.

“ Participation is particularly visible during elections. That must change! More evaluation and feedback on university policy is needed, more cooperation between all existing bodies should be promoted and international students who have been here for a long time must also be able to express their opinion in the participation council. ”
